Recombinant Human TMUB2 Protein (His Tag)

Catalog No. PKSH030580

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Synonyms FP2653;TMUB2

Species Human

HEK293 Cells **Expression Host** Tyr37-Ser245 Sequence Accession NP_803190.2 Calculated Molecular Weight 24 kDa Observed molecular weight 43 kDa Tag N-His

Bioactivity Not validated for activity

Properties

Purity > 95 % as determined by reducing SDS-PAGE.

Endotoxin < 1.0 EU per µg of the protein as determined by the LAL method.

Storage Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to

-80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots

of reconstituted samples are stable at < -20°C for 3 months.

Shipping This product is provided as lyophilized powder which is shipped with ice packs.

Formulation Lyophilized from sterile PBS, pH 7.4

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as

protectants before lyophilization.

Please refer to the specific buffer information in the printed manual.

Reconstitution Please refer to the printed manual for detailed information.

Data

> 95 % as determined by reducing SDS-PAGE.

Background

STC2 is a secreted, homodimeric glycoprotein which expressed in a wide variety of tissues. STC2 has an antihypocalcemic action on calcium and phosphate homeostasis. It may have autocrine or paracrine functions. Its C-terminus

contains a cluster of histidine residues which may interact with metal ions. STC2 has 10 of its 15 cysteine residues conserved among stanniocalcin family members and is phosphorylated by casein kinase 2 exclusively on its serine residues. It may play a role in the regulation of renal and intestinal calcium and phosphate transport, cell metabolism, or cellular calcium/phosphate homeostasis.
