

# Recombinant Human SIAE Protein (Baculovirus, His Tag)

Catalog Number:PKSH030659

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## Description

|                                    |  |
|------------------------------------|--|
| <b>Synonyms</b>                    | Sialate O-Acetylerase;H-Lse;Sialic Acid-Specific 9-O-Acetylerase;SIAE;YSG2;AIS6;CSE-C;CSEC |
| <b>Species</b>                     | Human  |
| <b>Expression Host</b>             | Baculovirus-Insect Cells   |
| <b>Sequence</b>                    | Met 1-Lys523   |
| <b>Accession</b>                   | Q9HAT2-1   |
| <b>Calculated Molecular Weight</b> | 57.4 kDa   |
| <b>Observed molecular weight</b>   | 61 kDa   |
| <b>Tag</b>                         | C-His  |

## Properties

|                       |  |
|-----------------------|--|
| <b>Purity</b>         | > 97 % as determined by reducing SDS-PAGE.   |
| <b>Endotoxin</b>      | < 1.0 EU per µg of the protein as determined by the LAL method.  |
| <b>Storage</b>        | Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.        |
| <b>Shipping</b>       | This product is provided as lyophilized powder which is shipped with ice packs.  |
| <b>Formulation</b>    | Lyophilized from sterile 20mM Tris, 500mM NaCl, pH 8.0<br>Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization.<br>Please refer to the specific buffer information in the printed manual. |
| <b>Reconstitution</b> | Please refer to the printed manual for detailed information.   |

## Data

> 97 % as determined by reducing SDS-PAGE.

## Background

Sialate O-acetylerase belongs to the family of hydrolases, specifically those acting on carboxylic ester bonds. It is widely expressed with high expression in the testis, prostate, and colon. The systematic name of this enzyme class is N-acyl-O-acetylneuraminic acid O-acetylhydrolase. Other names in common use include N-acetylneuraminic acid acetyltransferase, sialate 9(4)-O-acetylerase, and sialidase. Sialate O-acetylerase catalyzes the removal of O-acetyl ester groups from position 9 of the parent sialic acid, N-acetylneuraminic acid. Defects in Sialate O-acetylerase are a cause of autoimmune disease type 6 (AIS6). Individuals manifesting susceptibility to autoimmune disease type 6 can suffer from juvenile idiopathic arthritis, rheumatoid arthritis, multiple sclerosis, Sjogren syndrome, systemic lupus erythematosus,
