# PE/Cyanine7 Anti-Human CD79a Antibody[HM47]

Catalog No.E-AB-F1370HReactivityHumanStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsICFCM

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

Alternate Names Mb-1, Iga, CD79

Uniprot ID P11912 Gene ID 973

**Background** CD79a is a 47 kD type I integral membrane protein, also known as mb-1 or Iga. It is a member of

the Ig superfamily and disulphide-associated with CD79b (B29). The interaction of

CD79a/CD79b heterodimer with B cell suface Ig forms B cell antigen receptor complex. CD79a is expressed in B cells from early pre-B to plasma cell stage. It has been shown that CD79a is also weakly expressed in some precursors of T- and myeloid cells. CD79 mediates the transport of

IgM to B cell surface and transduces signals initiated by BCR aggregation.

#### **Product Details**

Form Liquid

Size 20Tests/100Tests/100Tests×2

Clone No. HM47 Host Mouse

**Isotype** Mouse IgG1,  $\kappa$ 

**Reactivity** Human **Application** ICFCM

**Isotype Control** PE/Cvanine7 Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792H]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

**Shipping** Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

## **Fluorophore**

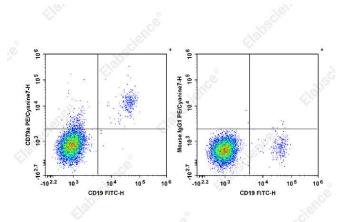

Conjugation: PE/Cyanine7

PE/Cyanine7 is designed to be excited by the Blue (488 nm), Green (532 nm) and yellow-green (561 nm) lasers and detected using an optical filter centered near 775 nm (e.g., a 780/60 nm bandpass filter).

## Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

#### **Product data**

Staining of normal human peripheral blood cells with FITC Anti-Human CD19 Antibody and PE/Cyanine7 Anti-Human CD79a Antibody[HM47] (left) or PE/Cyanine7 Mouse IgG1, κ Isotype Control (right). Cells in the lymphocytes gate were used for analysis.
