Recombinant Human TNF-alpha/TNFA Protein (Active)

Catalog Number: PKSH031984

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Expression HostE.coliExpression HostE.coliSequenceVal 77-Leu 233VaccessionNP_000585.2Calculated Molecular Weight17.4 kDaDiserved molecular weight17.4 kDaBioactivityMeasured in a cytotoxicity assay using L929 mouse fibrosarcoma cells in the presence of the metabolic inhibitor actinomycin D.The ED50 for this effect is typically 5-50 pg/mL.PropertiesPropertiesPurity> 95 % as determined by reducing SDS-PAGE.EndotoxinPlease contact us for more information.StorageLyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.ShippingThis product is provided as lyophilized powder which is shipped with ice packs. Lyophilized from sterile PBS, pH 7.4 1. Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization. Specific concentrations are included in the hardcopy of COA. 2. Please contact us for an concerns or special	Description

Background

Tumor necrosis factor alpha (TNF-alpha), also known as TNF, TNFA or TNFSF2, is the prototypic cytokine of the TNF superfamily, and is a multifunctional molecule involved in the regulation of a wide spectrum of biological processes including cell proliferation, differentiation, apoptosis, lipid metabolism, and coagulation. Two receptors, TNF-R1 (TNF receptor type 1; CD120a; p55/60) and TNF-R2 (TNF receptor type 2; CD120b; p75/80), bind to TNF-alpha. TNF-alpha protein is produced mainly by macrophages, and large amounts of this cytokine are released in response to

lipopolysaccharide, other bacterial products, and Interleukin-1 (IL-1). TNF-alpha is involved in fighting against the tumorigenesis, thus, is regarded as a molecular insight in cancer treatment. TNF-alpha Protein & Antibody
