Recombinant Human CCL16 Protein

Catalog No. PKSH032188

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Synonyms C-C Motif Chemokine 16;Chemokine CC-4;HCC-4;Chemokine

LEC;IL-10-Inducible Chemokine;LCC-1;Liver-Expressed Chemokine;Lymphocyte and Monocyte Chemoattractant;LMC;Monotactin-1;MTN-1;NCC-4;Small-Inducible

Cytokine A16;CCL16;ILINCK;NCC4;SCYA16

Species Human
Expression Host E.coli

Sequence Gln24-Gln120
Accession O15467

Calculated Molecular Weight 11.0 kDa
Observed molecular weight 14 kDa
Tag None

Bioactivity Not validated for activity

Properties

Purity > 95 % as determined by reducing SDS-PAGE.

Endotoxin < 1.0 EU per µg of the protein as determined by the LAL method.

Storage Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to

-80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots

of reconstituted samples are stable at $< -20^{\circ}$ C for 3 months.

Shipping This product is provided as lyophilized powder which is shipped with ice packs.

Formulation Lyophilized from a 0.2 μm filtered solution of 20mM PB, 150mM NaCl, pH 7.4.

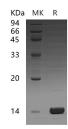

Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as

protectants before lyophilization.

Please refer to the specific buffer information in the printed manual.

Reconstitution Please refer to the printed manual for detailed information.

Data

> 95 % as determined by reducing SDS-PAGE.

Background

CCL16 is a member of CC chemokine family. CCL16 cDNA encodes a 120 amino acid peptide along with a 23 amino acids signal peptide that is cleaved to generate 97 amino acid protein. CCL16 is distantly related to other CC chemokines, showing less than 30% sequence identity. CCL16 elicits its effects on cells by interacting with cell surface chemokine receptors such as CCR1, CCR2, CCR5 and CCR8. Recombinant CCL16 has been shown to chemoattract human monocytes and THP1 cells but not resting lymphocytes nor neutrophils. CCL16 has potent myelosuppressive activity, suppresses proliferation of myeloid progenitor cells. CCL16ninduces a calcium flux in THP1 cells that can be desensitized by prior exposure to RANTES, suggesting that CCL16 and RANTES share the same receptor in THP1 cells.
