Recombinant Human Complement Factor H/CFH Protein (His Tag)

Catalog No. PKSH032273

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Synonyms AHUS1;AMBP1;ARMD4;ARMS1;CFHL3;FH;FHL1;HF;HF1;HF2;HUS

Species Human

Expression Host

Sequence
Glu19-Leu449
Accession
P08603-2
Calculated Molecular Weight
Observed molecular weight
Tag

HEK293 Cells

Glu19-Leu449

50.0 kDa

50 kDa

C-His

Bioactivity Not validated for activity

Properties

Purity > 95 % as determined by reducing SDS-PAGE.

Endotoxin < 1.0 EU per µg of the protein as determined by the LAL method.

Storage Storage Store at < -20°C, stable for 6 months. Please minimize freeze-thaw cycles.

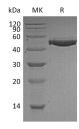

Shipping This product is provided as liquid. It is shipped at frozen temperature with blue

ice/gel packs. Upon receipt, store it immediately at < - 20°C.

Formulation Supplied as a 0.2 μm filtered solution of PBS,20%Glycerol,5% Trehalose,pH7.4.

Reconstitution Not Applicable

Data

> 95 % as determined by reducing SDS-PAGE.

Background

Complement Factor H (CFH) is a secreted protein which is a member of the regulators of complement activation family and is a complement control protein. It is expressed by the liver and secreted in plasma. Its principal function is to regulate the Alternative Pathway of the complement system, ensuring that the complement system is directed towards pathogens or other dangerous material and does not damage host tissue. Factor H regulates complement activation on self cells and surfaces by possessing both cofactor activity for the Factor I mediated C3b cleavage, and decay accelerating activity against the alternative pathway C3-convertase, C3bBb. Factor H exerts its protective action on self cells and self surfaces
