## **Recombinant Human CTGF/CCN2 Protein (Fc Tag)**

Catalog No. PKSH032276

Note: Centrifuge before opening to ensure complete recovery of vial contents.

#### **Description**

Synonyms Connective tissue growth factor; CCN family member 2; Hypertrophic chondrocyte-

specific protein 24;Insulin-like growth factor-binding protein 8;CTGF;IGFBP8

Species Human

Expression Host HEK293 Cells
Sequence Gln27-Ala349
Accession Q5M8T4
Calculated Molecular Weight 62.6 kDa
Observed molecular weight 67-81 kDa
Tag C-Fc

**Bioactivity** Not validated for activity

### **Properties**

**Purity** > 90 % as determined by reducing SDS-PAGE.

**Endotoxin** < 1.0 EU per μg of the protein as determined by the LAL method.

**Storage** Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to

-80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots

of reconstituted samples are stable at < -20°C for 3 months.

**Shipping** This product is provided as lyophilized powder which is shipped with ice packs.

**Formulation** Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.

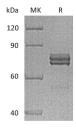

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as

protectants before lyophilization.

Please refer to the specific buffer information in the printed manual.

**Reconstitution** Please refer to the printed manual for detailed information.

## Data

> 90 % as determined by reducing SDS-PAGE.

## **Background**

CTGF belongs to the CCN (CTGF/Cyr61/Cef10/NOVH) protein family; which is comprised of six secreted proteins that

reside in the extracellular matrix (ECM). CTGF causes a variety of cellular responses including reduced cell adhesion and enhanced cell migration and proliferation. CTGF has also been shown to be essential for epithelial to mesenchymal transition (EMT); a process whereby normal functioning cells morph into ones that produce mainly scar tissue (of which collagen in the major protein component).
