Recombinant Human Interleukin-17F/IL-17F Protein

Catalog No. PKSH032622

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Synonyms Interleukin-17F;IL-17F;Cytokine ML-1;Interleukin-24;IL-24;IL17F;IL24

Species Human
Expression Host E.coli

SequenceArg31-Gln163AccessionQ96PD4Calculated Molecular Weight15.8 kDaObserved molecular weight18 kDa

Bioactivity Measure by its ability to induce IL-6 secretion in 3T3 cells. The ED_{50} for this effect

is < 20 ng/mL.

Properties

Tag

Purity > 98 % as determined by reducing SDS-PAGE.

C-His

Endotoxin < 0.1 EU per µg of the protein as determined by the LAL method.

Storage Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to

-80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots

of reconstituted samples are stable at < -20°C for 3 months.

Shipping This product is provided as lyophilized powder which is shipped with ice packs.

Formulation Lyophilized from sterile 20 mM sodium acetate, pH 4.0.

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as

protectants before lyophilization.

Please refer to the specific buffer information in the printed manual.

Reconstitution Please refer to the printed manual for detailed information.

Data

> 98 % as determined by reducing SDS-PAGE.

Background

Interleukin-17 is a potent pro-inflammatory cytokine produced by activated memory T cells. There are at least six

members of the IL-17 family in humans and in mice. Today; IL-17 represents a family of structurally related cytokines that share a highly conserved C-terminal region but differ from one another in their N-terminal regions and in their distinct biological roles. The six known members of this family; IL-17A through IL-17F; are secreted as homodimers. IL-17F also regulates cartilage matrix turnover and inhibits angiogenesis.
