Recombinant Human OBFC1/STN1 Protein (His Tag)

Catalog No. PKSH032832

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Synonyms CST Complex Subunit STN1;Oligonucleotide/Oligosaccharide-Binding Fold-

Containing Protein 1;Suppressor of Cdc Thirteen Homolog;OBFC1;STN1

Species Human
Expression Host E.coli

SequenceMet 1-Phe368AccessionAAH17400.1Calculated Molecular Weight44.3 kDaObserved molecular weight44 kDaTagN-His

Bioactivity Not validated for activity

Properties

Purity > 80 % as determined by reducing SDS-PAGE.

Endotoxin < 1.0 EU per µg of the protein as determined by the LAL method.

Storage Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to

-80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots

of reconstituted samples are stable at < -20°C for 3 months.

Shipping This product is provided as lyophilized powder which is shipped with ice packs.

Formulation Lyophilized from a 0.2 µm filtered solution of 20mM Tris-HCl, 1mM DTT, 5%

Trehalose, pH 8.0.

Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as

protectants before lyophilization.

Please refer to the specific buffer information in the printed manual.

Reconstitution Please refer to the printed manual for detailed information.

Data

> 80 % as determined by reducing SDS-PAGE.

A Reliable Research Partner in Life Science and Medicine

CST Complex Subunit STN1 (OBFC1) is a 368 amino acid protein that contains one OB DNA-binding domain. It is a member of the STN1 family. OBFC1 is component of the CST complex, a complex that binds to single-stranded DNA and is required to protect telomeres from DNA degradation. The CST complex binds single-stranded DNA with high affinity in a sequence-independent manner, while isolated subunits bind DNA with low affinity by themselves. In addition to telomere protection, the CST complex has probably a more general role in DNA metabolism at non-telomeric sites.
