### **Recombinant Human TGFB2 Protein**

Catalog No. PKSH033139

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

#### **Description**

Synonyms Transforming growth factor beta-2;TGFB2;Polyergin;G-TSF;Glioblastoma-derived

T-cell suppressor factor; Cetermin; BSC-1 cell growth inhibitor; TGF-beta-2

Species Human

**Expression Host** HEK293 Cells **Sequence** Ala303-Ser414

AccessionP61812Calculated Molecular Weight12.7 kDaObserved molecular weight12 kDaTagNone

**Bioactivity** Measured by its ability to inhibit the IL-4-dependent proliferation of TF-1 cells. The

ED50 for this effect is 30-180pg/ml.

# **Properties**

**Purity** > 95 % as determined by reducing SDS-PAGE.

**Endotoxin** < 0.01 EU per  $\mu$ g of the protein as determined by the LAL method.

**Storage** Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to

-80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots

of reconstituted samples are stable at < -20°C for 3 months.

**Shipping** This product is provided as lyophilized powder which is shipped with ice packs.

**Formulation** Lyophilized from a 0.2 μm filtered solution of 4mM HCl.

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as

protectants before lyophilization.

Please refer to the specific buffer information in the printed manual.

**Reconstitution** Please refer to the printed manual for detailed information.

### Data

> 95 % as determined by reducing SDS-PAGE.

A Reliable Research Partner in Life Science and Medicine

Transforming growth factor beta-2 (TGF- $\beta$ 2) is a secreted protein which belongs to the TGF-beta family. It is known as a cytokine that performs many cellular functions and has a vital role during embryonic development. The precursor is cleaved into mature TGF-beta-2 and LAP, which remains non-covalently linked to mature TGF-beta-2 rendering it inactive. It is an extracellular glycosylated protein. It is known to suppress the effects of interleukin dependent T-cell tumors. Defects in TGFB2 may be a cause of non-syndromic aortic disease (NSAD).
