Recombinant Human SNAP-alpha/NAPA Protein (His Tag) 🤷

Catalog Number: PKSH033253

Note: Centrifuge before opening to ensure complete recovery of vial contents.

| Description | |
|-----------------------------|---|
| Synonyms | Alpha-Soluble NSF Attachment Protein;SNAP-Alpha;N-Ethylmaleimide-Sensitive Factor Attachment Protein Alpha;NAPA;SNAPA |
| Species | Human |
| Expression Host | E.coli |
| Sequence | Met 1-Arg295 |
| Accession | P54920 |
| Calculated Molecular Weight | 35.4 kDa |
| Observed molecular weight | 35 kDa |
| Tag | N-His |
| Properties | |
| Purity | > 95 % as determined by reducing SDS-PAGE. |
| Endotoxin | < 1.0 EU per µg of the protein as determined by the LAL method. |
| Storage | Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months. |
| Shipping | This product is provided as lyophilized powder which is shipped with ice packs. |
| Formulation | Lyophilized from a 0.2 μ m filtered solution of 20mM Tris-HCl, 150mM NaCl, pH 8.0. |
| | Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization. Please refer to the specific buffer information in the print |
| | Please refer to the printed manual for detailed information. |

> 95 % as determined by reducing SDS-PAGE.

Background

 α -Soluble NSF Attachment Protein (SNAP- α) is a member of the SNAP (Soluble NSF Attachment Protein) family. SNAP- α interacts with PRKCABP and disrupts the interaction between GRIA2 and PRKCABP, leading to the internalization of GRIA2. SNAP- α is required for vesicular transport between the endoplasmic reticulum and the Golgi apparatus. SNAP- α is in charge of the binding of NSF and therefore the formation of a 20S fusion particle.
