Recombinant Mouse NgR/RTN4R Protein (His Tag)

Catalog No. PKSM041117

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Synonyms Reticulon-4 Receptor;Nogo Receptor;NgR;Nogo-66 Receptor;RTN4R;NOGOR

Species Mouse

Expression Host HEK293 Cells
Sequence Cys27-Ser447
Accession Q99PI8
Calculated Molecular Weight 46.6 kDa
Observed molecular weight 75-85 kDa

Bioactivity Not validated for activity

Properties

Tag

Purity > 95 % as determined by reducing SDS-PAGE.

C-His

Endotoxin < 1.0 EU per ug of the protein as determined by the LAL method.

Storage Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to

-80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots

of reconstituted samples are stable at < -20°C for 3 months.

Shipping This product is provided as lyophilized powder which is shipped with ice packs.

Formulation Lyophilized from a 0.2 μm filtered solution of PBS, pH 7.4.

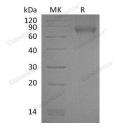

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as

protectants before lyophilization.

Please refer to the specific buffer information in the printed manual.

Reconstitution Please refer to the printed manual for detailed information.

Data

> 95 % as determined by reducing SDS-PAGE.

Background

Nogo Receptor (NgR) is a glycosylphosphoinositol (GPI)-anchored protein that belongs to the Nogo recptor family. Human NgR is predominantly expressed in neurons and their axons in the central nervous systems. As a receptor for

myelin-derived proteins Nogo, myelin-associated glycoprotein (MAG) and myelin oligodendrocyte glycoprotein (OMG), NgR mediates axonal growth inhibition and may play a role in regulating axonal regeneration and plasticity in the adult central nervous system. NgR may be proposed as a potential drug target for treatment of various neurological conditions. Additionally, NgR may play a role in regulating the function of gap junctions.
