Elabscience®

APC Anti-Mouse CD161/NK1.1 Antibody[PK136]

Catalog No.E-AB-F0987EStorageStore at 2~8°C, Avoid freeze / thaw cycles

ReactivityMouseApplicationsFCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names	Killer cell lectin-like receptor subfamily B member 1C,Klrb1c,CD161 antigen-like family member C,Ly-55c,NK1.1,NKR-P1.9,NKR-P1C,NKR-P1 40,CD161c
Uniprot ID	P27814,P27812,Q99JB4
Background	NK-1.1 surface antigen, also known as CD161b/CD161c and Ly-55, is encoded by the NKR-
	P1B/NKR-P1C gene. It is expressed on NK cells and NK-T cells in some mouse strains, including
	C57BL/6, FVB/N, and NZB, but not AKR, BALB/c, CBA/J, C3H, DBA/1, DBA/2, NOD, SJL,
	and 129. Expression of NKR-P1C antigen has been correlated with lysis of tumor cells in vitro
	and rejection of bone marrow allografts in vivo. NK-1.1 has also been shown to play a role in NK
	cell activation, IFN-7 production, and cytotoxic granule release. NK-1.1 and DX5 are commonly
	used as mouse NK cell markers.

Product Details

Form	Liquid
Size	50Tests/100Tests/100Tests×2
Clone No.	PK136
Host	Mouse
Isotype	Mouse IgG2a, ĸ
Reactivity	Mouse
Application	FCM
Isotype Control	APC Mouse IgG2a, κ Isotype Control[C1.18.4] [Product E-AB-F09802E]
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Shipping	Biological ice pack at 4 °C
Stability & Storage	Keep as concentrated solution.
	Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.
	This product is guaranteed up to one year from purchase.

For Research Use Only

Elabscience®

Fluorophore

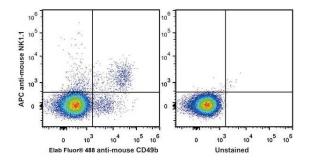

Conjugation: APC

APC is designed to be excited by the Red (627-640 nm) laser and detected using an optical filter centered near 660 nm (e.g., a 660/20 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Product data

C57BL/6 murine splenocytes are stained with APC Anti-Mouse CD161/NK1.1 Antibody and Elab Fluor[®] 488 Anti-Mouse CD49b Antibody (Left). Unstained splenocytes are used as control.
