Antigen Information

Alternate Names	L-selectin,Sell,CD62 antigen-like family member L,LAM-1,LECAM1,Lymph node homing receptor,Ly-22, CD62L,Lnhr,Ly22
Uniprot ID	P18337
Background	CD62L is a 74-95 kD glycoprotein also known as L-selectin, LECAM-1, Ly-22, LAM-1, and
	MEL-14. It is a member of the selectin family and is expressed on the majority of B and nave T
	cells, a subset of memory T cells, monocytes, granulocytes, most thymocytes, and a subset of NK
	cells. CD62L is important in lymphocyte homing to high endothelial venules (HEV) in peripheral
	lymph nodes and leukocyte 'rolling' on activated endothelium. CD62L also contributes to
	neutrophil emigration at inflammatory sites. CD62L is rapidly shed from lymphocytes and
	neutrophils upon cellular activation and the expression levels of CD62L (in conjunction with
	other markers) have been used to distinguish nave, effector, and memory T cells. CD62L has
	been reported to interact with CD34, GlyCAM-1, and MAdCAM-1.

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is $\leq 1.0 \ \mu g$ per 10⁶ cells in 100 μL volume or 100 μL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.
