

A Reliable Research Partner in Life Science and Medicine

Purified Anti-Human CD47 Antibody[CC2C6D4]

Catalog No. E-AB-F1060A Reactivity Human Storage Store at 2~8°C, Avoid freeze / thaw cycles **Applications FCM**

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names Uniprot ID

Leukocyte surface antigen CD47, Cd47, Integrin-associated protein, IAP

O08722

Background CD47 also known as Rh-associated protein, gp42, integrin-associated protein (IAP), and

> neurophilin, is a 42-52 kD member of the immunoglobulin superfamily containing a five-pass transmembrane attachment. Two splice variants have been described in the cytoplasmic tail, the shorter form is expressed in bone-marrow-derived cells, endothelial cells, and fibroblasts while the longer form is expressed by neural tissues. CD47 expression is widely distributed in hematopoietic cells including thymocytes, T cells, B cells, monocytes, platelets, and erythrocytes

> as well as epithelial cells, endothelial cells, fibroblasts, and neural tissues. CD47 functions as an adhesion molecule and thrombospondin receptor and is non-covalently associated with β3 integrins CD51/CD61, CD41/CD61. Thrombospondin is a ligand for CD47; in the absence of CD47 mice show defects in host defense and β3 integrin-dependent ligand binding, migration,

and cellular activation. CD47 is also part of the Rh complex on erythrocytes.

Product Details

Form Liquid 0.5 mg/mLConcentration Size 25µg/100µg CC2C6D4 Clone No. Host Mouse

Isotype Mouse IgG1, κ

Reactivity Human **Application FCM**

Isotype Control Purified Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09793A]

Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer. **Storage Buffer**

Shipping Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at $2\sim8^{\circ}$ C .Do not freeze.

This product is guaranteed up to one year from purchase.

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is $\leq 0.5~\mu g$ per 10^6 cells in $100~\mu L$ volume or $100~\mu L$ of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.
