### FITC Anti-Mouse CD1d Antibody[19G11]

Catalog No. E-AB-F1032C Storage Store at 2~8°C, Avoid freeze / thaw cycles Reactivity Mouse Applications

FCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

#### **Antigen Information**

| Alternate Names | Antigen-presenting glycoprotein CD1d1,Cd1d1,CD1d.1,Cd1d1,Cd1.1  |
|-----------------|---|
| Uniprot ID      | P11609  |
| Background      | CD1d is a type I transmembrane protein and member of the MHC family, with a molecular weight ranging from 43-49 kD, depending on the glycosylation degree. CD1d is expressed by antigen presenting cells such as dendritic cells, monocytes, macrophages and B cells; also expressed by thymocytes and intestinal epithelial cells. CD1d present glycolipids to iNKT cells that recognize them by their V $\alpha$ 14i TCR. |

#### **Product Details**

| Form                | Liquid  |
|---------------------|---|
| Size                | 50Tests/100Tests/100Tests×2   |
| Clone No.           | 19G11   |
| Host                | Rat   |
| Isotype             | Rat IgG2b, κ  |
| Reactivity          | Mouse   |
| Application         | FCM   |
| Isotype Control     | FITC Rat IgG2b, κ Isotype Control[LTF-2] [Product E-AB-F09842C]                             |
| Storage Buffer      | Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant. |
| Shipping            | Biological ice pack at 4 °C   |
| Stability & Storage | Keep as concentrated solution.  |
|                     | Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.                |
|                     | This product is guaranteed up to one year from purchase.                                    |

**For Research Use Only**

### Fluorophore

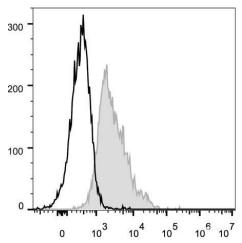

#### **Conjugation:** FITC

FITC is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 530 nm (e.g., a 525/40 nm bandpass filter).

#### **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

#### **Product data**

C57BL/6 murine splenocytes are stained with FITC Anti-Mouse CD1d Antibody (filled gray histogram). Unstained splenocytes (empty black histogram) are used as control.
