

A Reliable Research Partner in Life Science and Medicine

Elab Fluor® 647 Anti-Human CD47 Antibody[CC2C6D4]

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names Uniprot ID Leukocyte surface antigen CD47, Cd47, Integrin-associated protein, IAP

Q08722

Background CD47 also known as Rh-associated protein, gp42, integrin-associated protein (IAP), and

neurophilin, is a 42-52 kD member of the immunoglobulin superfamily containing a five-pass transmembrane attachment. Two splice variants have been described in the cytoplasmic tail, the shorter form is expressed in bone-marrow-derived cells, endothelial cells, and fibroblasts while the longer form is expressed by neural tissues. CD47 expression is widely distributed in hematopoietic cells including thymocytes, T cells, B cells, monocytes, platelets, and erythrocytes as well as epithelial cells, endothelial cells, fibroblasts, and neural tissues. CD47 functions as an adhesion molecule and thrombospondin receptor and is non-covalently associated with β 3 integrins CD51/CD61, CD41/CD61. Thrombospondin is a ligand for CD47; in the absence of

CD47 mice show defects in host defense and β3 integrin-dependent ligand binding, migration,

and cellular activation. CD47 is also part of the Rh complex on erythrocytes.

Product Details

Form Liquid

Size 20Tests/100Tests/100Tests×2

Clone No. CC2C6D4

Host Mouse

Isotype Mouse IgG1, κ

Reactivity Human **Application** FCM

Isotype Control Storage BufferElab Fluor® 647 Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792M]

Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at $2\sim8^{\circ}\text{C}$ and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

A Reliable Research Partner in Life Science and Medicine

Fluorophore

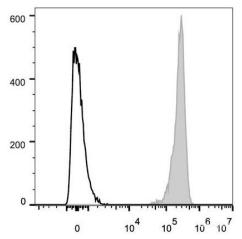

Conjugation: Elab Fluor® 647

Elab Fluor[®] 647 is designed to be excited by the Red laser (627-640 nm) and detected using an optical filter centered near 670 nm (e.g., a 660/20 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Product data

Human peripheral blood lymphocytes are stained with Elab Fluor[®] 647 Anti-Human CD47 Antibody (filled gray histogram). Unstained lymphocytes (empty black histogram) are used as control.
