Antigen Information

| Alternate Names | T-cell surface glycoprotein CD4, CD4, T-cell surface antigen T4/Leu-3, CD4 |
|-----------------|---|
| Uniprot ID | P06332 |
| Background | CD4 is a 55 kD protein also known as L3T4 or T4. It is a member of the Ig superfamily, |
| | primarily expressed on most thymocytes, a subset of T cells, and weakly on macrophages and |
| | dendritic cells. It acts as a coreceptor with the TCR during T cell activation and thymic |
| | differentiation by binding MHC class II and associating with the protein tyrosin kinase, lck. |

Fluorophore

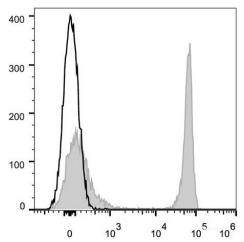

Conjugation: Elab Fluor[®] 647

Elab Fluor[®] 647 is designed to be excited by the Red laser (627-640 nm) and detected using an optical filter centered near 670 nm (e.g., a 660/20 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Product data

C57BL/6 murine splenocytes are stained with Elab Fluor[®] 647 Anti-Mouse CD4 Antibody (filled gray histogram). Unstained splenocytes (empty black histogram) are used as control.
