Elabscience®

Elab Fluor[®] 488 Anti-Mouse CD40 Antibody[FGK4.5/FGK45]

Catalog No.E-AB-F1028LStorageStore at 2~8°C, Avoid freeze / thaw cycles

ReactivityMouseApplicationsFCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names	Tumor necrosis factor receptor superfamily member 5,Cd40,B-cell surface antigen CD40,Bp50,CD40L receptor,CD40,Tnfrsf5
Uniprot ID	P27512
Background	CD40 is a 48 kD type I transmembrane glycoprotein also known as Bp50. It is a member of the
	tumor necrosis factor receptor (TNFR) superfamily and is expressed on B cells, basal epithelial
	cells, macrophages, follicular dendritic cells, endothelial cells, and a subset of CD34+
	hematopoietic progenitors. CD40 regulates B cell development/maturation, Ig isotype switching
	and, in combination with other signals such as IL-4, protects B cells from surface Ig-induced
	apoptosis and promotes proliferation. Interaction of CD40 with its ligand CD154 (gp39), which is
	expressed on activated T cells, is important in costimulation and immune regulation.

Product Details

Form	Liquid
Size	50Tests/100Tests/100Tests×2
Clone No.	FGK4.5/FGK45
Host	Rat
Isotype	Rat IgG2a, κ
Reactivity	Mouse
Application	FCM
Isotype Control	Elab Fluor [®] 488 Rat IgG2a, κ Isotype Control[2A3] [Product E-AB-F09832L]
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Shipping	Biological ice pack at 4 °C
Stability & Storage	Keep as concentrated solution.
	Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.
	This product is guaranteed up to one year from purchase.

For Research Use Only

Elabscience®

Fluorophore

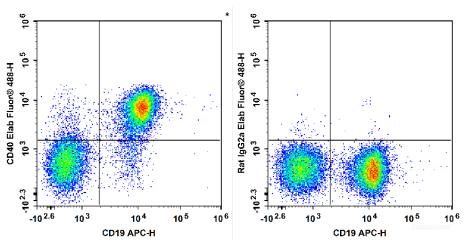

Conjugation: Elab Fluor[®] 488

Elab Fluor[®] 488 is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 520 nm (e.g., a 525/40 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Product data

C57BL/6 murine splenocytes are stained with APC Anti-Mouse CD19 Antibody and Elab Fluor[®] 488 Anti-Mouse CD40 Antibody[FGK4.5/FGK45] (Left). Splenocytes are stained with APC Anti-Mouse CD19 Antibody and Elab Fluor[®] 488 Rat IgG2a, κ Isotype Control (Right).
