

## PE/Cyanine7 Anti-Mouse CD3 $\epsilon$ Antibody[145-2C11]

|                    |  |                     |       |
|--------------------|--|---------------------|-------|
| <b>Catalog No.</b> | E-AB-F1103H                                | <b>Reactivity</b>   | Mouse |
| <b>Storage</b>     | Store at 2~8°C, Avoid freeze / thaw cycles | <b>Applications</b> | FCM   |

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### Antigen Information

|                        |  |
|------------------------|--|
| <b>Alternate Names</b> | T-cell surface glycoprotein CD3 epsilon chain,CD3E,T-cell surface antigen T3/Leu-4 epsilon chain,CD3 $\epsilon$ ,CD3E,T3E  |
| <b>Uniprot ID</b>      | P22646   |
| <b>Background</b>      | CD3 $\epsilon$ is a 20 kD transmembrane protein, also known as CD3 or T3. It is a member of the Ig superfamily and primarily expressed on T cells, NK-T cells, and at different levels on thymocytes during T cell differentiation. CD3 $\epsilon$ forms a TCR complex by associating with the CD3 $\delta$ , $\gamma$ and $\zeta$ chains, as well as the TCR $\alpha/\beta$ or $\gamma/\delta$ chains. CD3 plays a critical role in TCR signal transduction, T cell activation, and antigen recognition by binding the peptide/MHC antigen complex. |

### Product Details

|                                |  |
|--------------------------------|--|
| <b>Form</b>                    | Liquid   |
| <b>Size</b>                    | 50Tests/100Tests/100Tests $\times$ 2   |
| <b>Clone No.</b>               | 145-2C11   |
| <b>Host</b>                    | Armenian Hamster   |
| <b>Isotype</b>                 | Armenian Hamster IgG   |
| <b>Reactivity</b>              | Mouse  |
| <b>Application</b>             | FCM  |
| <b>Isotype Control</b>         | <a href="#">PE/Cyanine7 Armenian Hamster IgG Isotype Control[PIP] [Product E-AB-F09852H]</a>   |
| <b>Storage Buffer</b>          | Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.  |
| <b>Shipping</b>                | Biological ice pack at 4 °C  |
| <b>Stability &amp; Storage</b> | Keep as concentrated solution.<br>Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.<br>This product is guaranteed up to one year from purchase. |

### For Research Use Only

## Fluorophore

**Conjugation:** PE/Cyanine7

PE/Cyanine7 is designed to be excited by the Blue (488 nm), Green (532 nm) and yellow-green (561 nm) lasers and detected using an optical filter centered near 775 nm (e.g., a 780/60 nm bandpass filter).

## Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. **The amount of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100 µL staining volume or per 100 µL of whole blood).** Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

## Product data

C57BL/6 murine splenocytes are stained with PE/Cyanine7 Anti-Mouse CD3 $\epsilon$  Antibody (filled gray histogram). Unstained splenocytes (empty black histogram) are used as control.
