## FITC Anti-Human CD107a/LAMP-1 Antibody[H4A3]

Catalog No. E-AB-F1149C Reactivity Human Storage Store at 2~8°C, Avoid freeze / thaw cycles **Applications FCM** 

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

**Alternate Names** Lysosome-Associated Membrane Protein 1, LGP-120, LAMP-1

**Uniprot ID** P11279

**Background** CD107a, also known as Lysosome-Associated Membrane Protein 1 (LAMP-1) or LGP-120, is a

110-140 kD type I membrane glycoprotein. Mature CD107a is heavily glycosylated from a 40 kD core protein. This molecule is located on the luminal side of lysosomes. Upon activation, CD107a

is transferred to the cell membrane surface of activated platelets, activated lymphocytes,

macrophages, epithelial cells, endothelial cells, and some tumor cells. CD107a has been suggested to play a role in the protection of lysosomal membrane from lysosomal hydrolases which is involved in cell adhesion and regulation of tumor metastasis, and mediates autoimmune disease progression. CD107a is a ligand for galaptin and E-selectin. Surface expression of LAMP-1 has

been shown to correlate with CD8+ T cell and NK cell cytotoxicity.

#### **Product Details**

Form Liquid

Size 20Tests/100Tests/100Tests×2

Clone No. H4A3 Host Mouse

Mouse IgG1, κ **Isotype** 

Reactivity Human **FCM Application** 

FITC Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792C] **Isotype Control** 

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

A Reliable Research Partner in Life Science and Medicine

# **Fluorophore**

Conjugation: FITC

FITC is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 530 nm (e.g., a 525/40 nm bandpass filter).

### **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

#### **Product data**

Intracellular staining of the Jurkat cell line with FITC Anti-Human CD107a/LAMP-1 Antibody (filled gray histogram) or Mouse IgG1 Isotype Control FITC (empty black histogram).
