## FITC Anti-Human CD206/MMR Antibody[15-2]

Catalog No.E-AB-F1161CReactivityHumanStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsFCM

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

Alternate Names CLEC13D,CLEC13DL,MRC1L1,MMR,hMR

**Uniprot ID** P22897 **Gene ID** 4360

**Background** Macrophage mannose receptor (MMR) is a 162-175 kD type I membrane protein also known as

CD206, MRC1, or mannose receptor (MR). It is a pattern recognition receptor (PRR) that belongs to C-type lectin superfamily. MMR is expressed on macrophages, dendritic cells, and hepatic or lymphatic endothelial cells, but not on monocytes. MMR recognizes a range of microbial carbohydrates bearing mannose, fucose, or N-acetyl glucosamine. MMR mediates endocytosis and phagocytosis, induces activation of macrophages and antigen presentation, plays an important role in host defense, and provides a link between innate and adaptive immunity.

### **Product Details**

Form Liquid

Size 20Tests/100Tests/100Tests×2

Clone No. 15-2

Host Mouse

Isotype Mouse IgG1,  $\kappa$ Reactivity Human

Application FCM

**Isotype Control** FITC Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792C]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

# **Fluorophore**

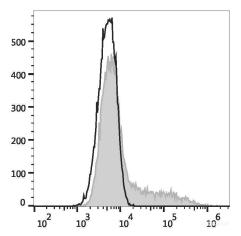

Conjugation: FITC

FITC is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 530 nm (e.g., a 525/40 nm bandpass filter).

## **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

### **Product data**

HEK293T cells transiently transfected with pcDNA3.1 plasmid encoding Human CD206 gene are stained with FITC Anti-Human CD206 Antibody (filled gray histogram) or FITC Mouse IgG1, κ Isotype Control (empty black histogram).
