# **Elabscience**®

# FITC Anti-Human CD61 Antibody[VI-PL2]

Catalog No.E-AB-F1166CStorageStore at 2~8°C, Avoid freeze / thaw cycles

Reactivity Applications

Human s FCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

### **Antigen Information**

Alternate Names Uniprot ID Background	GP3A,GPIIIa,ITGB3,Integrin beta-3 P05106 CD61, also known as integrin $\beta$ 3 and glycoprotein IIIa (gpIIIa), is a 90 kD type I integral transmembrane glycoprotein. It is a member of the integrin family, associating with platelet gpIIb (CD41) to form CD41/CD61 complex and with integrin $\alpha$ V (CD51) to form $\alpha$ V/ $\beta$ 3 (CD51/CD61) integrin. CD41/CD61 is expressed on platelets and megakaryocytes, and plays a role in platelet activation and aggregation through interaction with fibrinogen, fibronectin, vWF, and other RGD-containing adhesion molecules. CD51/CD61 is expressed on platelets, osteoclasts, fibroblasts, macrophages, and some tumor cells involved in tumor metastasis, and in adenovirus infaction through hinding to PCD motif in extracellular matrix protains.
	infection through binding to RGD motif in extracellular matrix proteins.

#### **Product Details**

Form	Liquid
-	1
Size	20Tests/100Tests/100Tests×2
Clone No.	VI-PL2
Host	Mouse
Isotype	Mouse IgG1, ĸ
Reactivity	Human
Application	FCM
Isotype Control	FITC Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792C]
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Shipping	Biological ice pack at 4 °C
Stability & Storage	Keep as concentrated solution.
	Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.
	This product is guaranteed up to one year from purchase.

For Research Use Only

# **Elabscience**®

## Fluorophore

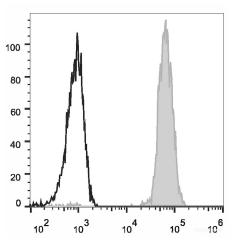

#### **Conjugation:** FITC

FITC is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 530 nm (e.g., a 525/40 nm bandpass filter).

#### **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

### **Product data**

Human peripheral blood platelets are stained with FITC Anti-Human CD61 Antibody (filled gray histogram). Unstained platelets (empty black histogram) are used as control.
