# APC Anti-Mouse CD69 Antibody[H1.2F3]

Catalog No. E-AB-F1187E Reactivity Mouse Storage Store at 2~8°C, Avoid freeze / thaw cycles **Applications FCM** 

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### **Antigen Information**

**Alternate Names** AIM,CLEC2C,GP32/28,MLR-3,VEA,EA1

**Uniprot ID** P37217 Gene ID 12515

**Background** CD69 is a 60 kD type II membrane protein composed of a 27/33 kD disulfide-linked homodimer,

> also known as Very Early Activation Antigen (VEA), AIM, EA1, MLR3, and gp34/28. It is expressed on a subset of thymocytes and platelets. CD69 is rapidly induced on activated T and B cells, neutrophils, and NK cells. It is a C-type lectin, closely related to the NKR-P1 and Ly-49 NK cell activation molecules. CD69 is involved in the early events of cell activation and thymocyte

positive selection.

#### **Product Details**

Form Liquid

Size 50Tests/100Tests/100Tests×2

Clone No. H1.2F3

Host Armenian Hamster Armenian Hamster IgG **Isotype** 

Reactivity Mouse **Application FCM** 

**Isotype Control** APC Armenian Hamster IgG Isotype Control[PIP] [Product E-AB-F09852E]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

A Reliable Research Partner in Life Science and Medicine

## **Fluorophore**

Conjugation: APC

APC is designed to be excited by the Red (627-640 nm) laser and detected using an optical filter centered near 660 nm (e.g., a 660/20 nm bandpass filter).

## **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

#### **Product data**

Cell Stimulation Cocktail-stimulated C57BL/6 mouse splenocytes (5 h) are stained with APC Anti-Mouse CD69 Antibody (filled gray histogram). Unstained stimulated splenocytes (empty black histogram) are used as control.
