## PE Anti-Mouse FceRIa Antibody[MAR-1]

Catalog No.E-AB-F1188DStorageStore at 2~8°C, Avoid freeze / thaw cycles

ReactivityMouseApplicationsFCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

#### **Antigen Information**

Alternate Names Uniprot ID Background	High affinity immunoglobulin epsilon receptor subunit alpha,Fc-epsilon RI-alpha,FcERI,Fcer1a P20489 Fc $\alpha$ RI $\alpha$ is a transmembrane protein belonging to the Ig superfamily. Fc $\alpha$ RI $\alpha$ forms a tetrameric complex with one $\beta$ and two $\gamma$ -subunits. The Fc $\alpha$ RI complex plays an important role in triggering IgE-mediated allergic reactions. It is abundantly expressed on mast and basophils and up-regulated by the presence of IgE. Following stimulation via Fc $\alpha$ RI $\alpha$ , mast cells and basophils release bioactive chemical mediators such as histamine, resulting in the initiation of allergic reactions. Cross linking of the high-affinity receptor for IgE on tissue mast cells triggers
	reactions. Cross linking of the high-affinity receptor for IgE on tissue mast cells triggers immediate hypersensitivity with local symptoms. The MAR-1 monoclonal antibody reacts with the $Fc\epsilon RI\alpha$ subunit.

#### **Product Details**

Form	Liquid
Size	50Tests/100Tests/100Tests×2
Clone No.	MAR-1
Host	Armenian Hamster
Isotype	Armenian Hamster IgG
Reactivity	Mouse
Application	FCM
Isotype Control	PE Armenian Hamster IgG Isotype Control[PIP] [Product E-AB-F09852D]
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Shipping	Biological ice pack at 4 °C
Stability & Storage	Keep as concentrated solution.
	Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.
	This product is guaranteed up to one year from purchase.

**For Research Use Only** 

# **Elabscience**®

### Fluorophore

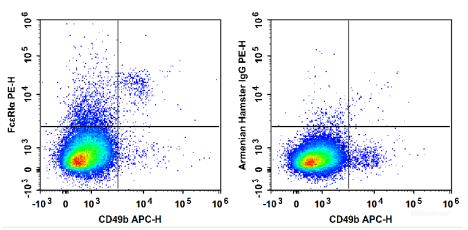

#### **Conjugation:** PE

PE is designed to be excited by the Blue (488 nm), Green (532 nm) and Yellow-Green (561 nm) lasers and detected using an optical filter centered near 575 nm (e.g., a 585/42 nm bandpass filter).

#### **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

### **Product data**

C57BL/6 murine bone marrow cells are stained with APC Anti-Mouse CD49b Antibody and PE Anti-Mouse FcεRIα Antibody (Left). Bone marrow cells stained with APC Anti-Mouse CD49b Antibody and PE Armenian Hamster IgG Isotype Control (Right) are used as control.
