# PE Anti-Mouse CD11c Antibody[N418]

E-AB-F0991UD Catalog No. Reactivity Mouse Storage Store at 2~8°C, Avoid freeze / thaw cycles **Applications FCM** 

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

**Alternate Names** Integrin alpha-X,Itgax,CD11 antigen-like family member C,Leukocyte adhesion receptor

p150+95,CD11c

**Uniprot ID** Q9QXH4

**Background** CD11c is a 150 kD glycoprotein also known as αX integrin, CR4, and p150. CD11c forms a

> αΧβ2 heterodimer with β2 integrin (CD18). It is primarily expressed on dendritic cells, NK cells, a subset of intestinal intraepithelial lymphocytes (IEL), and some activated T cells. The  $\alpha X\beta 2$ integrin plays an important role in cell-cell contact by binding its ligands: iC3b, fibrinogen and

CD54.

#### **Product Details**

Form Liquid Concentration 0.2 mg/mLSize  $25 \mu g / 100 \mu g$ Clone No. N418

Host Armenian Hamster Armenian Hamster IgG **Isotype** 

Reactivity Mouse **Application FCM** 

PE Armenian Hamster IgG Isotype Control[PIP] [Product E-AB-F09853D] **Isotype Control** 

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

# **Fluorophore**

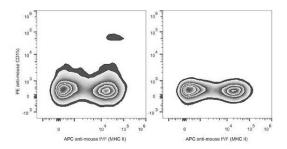

### Conjugation: PE

PE is designed to be excited by the Blue (488 nm), Green (532 nm) and Yellow-Green (561 nm) lasers and detected using an optical filter centered near 575 nm (e.g., a 585/42 nm bandpass filter).

## **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is  $0.1-1~\mu g/10^6$  cells in  $100~\mu L$  volume].

#### **Product data**

C57BL/6 murine splenocytes are stained with PE Anti-Mouse CD11c Antibody and APC Anti-Mouse MHC II (I-A/I-E) Antibody (Left). Splenocytes stained with APC Anti-Mouse MHC II (I-A/I-E) Antibody (Right) are used as control.
