### PE/Cyanine5.5 Anti-Mouse CD86 Antibody[GL-1]

Catalog No. E-AB-F0994UI Reactivity Mouse Store at 2~8°C, Avoid freeze / thaw cycles Storage **Applications FCM** 

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### **Antigen Information**

**Alternate Names** T-lymphocyte activation antigen CD86,Cd86,Activation B7-2 antigen,Early T-cell costimulatory

molecule 1,ETC-1

**Uniprot ID** P42082

**Background** CD86 is an 80 kD immunoglobulin superfamily member also known as B7-2, B70, and Ly-58.

> CD86 is expressed on activated B and T cells, macrophages, dendritic cells, and astrocytes. CD86, along with CD80, is a ligand of CD28 and CD152 (CTLA-4). CD86 is expressed earlier in the immune response than CD80. CD86 has also been shown to be involved in immunoglobulin classswitching and triggering of NK cell-mediated cytotoxicity. CD86 binds to CD28 to transduce costimulatory signals for T cell activation, proliferation, and cytokine production. CD86 can also

bind to CD152, also known as CTLA-4, to deliver an inhibitory signal to T cells.

#### **Product Details**

**Form** Liquid Concentration 0.2 mg/mL Size  $25 \mu g / 100 \mu g$ Clone No. GL-1

Host Rat

Isotype Rat IgG2a, κ Reactivity Mouse **FCM Application** 

**Isotype Control** PE/Cyanine5.5 Rat IgG2a, κ Isotype Control[2A3] [Product E-AB-F09833I]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

## **Fluorophore**

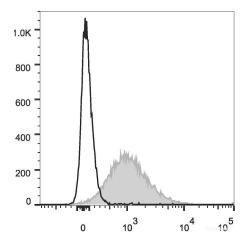

Conjugation: PE/Cyanine5.5

PE/Cyanine5.5 is designed to be excited by the Blue (488 nm), Green (532 nm) and yellow-green (561 nm) lasers and detected using an optical filter centered near 690 nm (e.g., a 690/50 nm bandpass filter).

# **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1  $\mu g/10^6$  cells in  $100~\mu L$  volume].

#### **Product data**

C57BL/6 murine splenocytes are stained with PE/Cyanine5.5 Anti-Mouse CD86 Antibody (filled gray histogram).

Unstained splenocytes (empty black histogram) are used as control.
