Elabscience®

PerCP/Cyanine5.5 Anti-Mouse CD22 Antibody[Cy34.1]

Catalog No.E-AB-F1021UJStorageStore at 2~8°C, Avoid freeze / thaw cycles

ReactivityMouseApplicationsFCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names	B-cell receptor CD22,Cd22,B-lymphocyte cell adhesion molecule,BL-CAM,Sialic acid-binding Ig- like lectin 2,Siglec-2,T-cell surface antigen Leu-14,CD22,Lyb-8, Siglec2
Uniprot ID	P35329
Gene ID	12483
Background	The Cy34.1 monoclonal antibody specifically binds to the B-lymphocyte differentiation antigen
	CD22 on strains having the Lyb-8.2 alloantigen (e.g., A, BALB/c, CBA, C3H/He, C57BL, C57L,
	C58, SJL, SWR, but not AKR, DBA/1, DBA/2, NZB, PL). CD22 is expressed at high levels on
	mature peripheral B lymphocytes (follicular and marginal zone), B-1 cells (CD5+ B cells), and
	plasma cells. It is a member of the Ig gene superfamily and associates with the B-cell antigen
	receptor. Its sialic acid- binding immunoglobulin-like lectin (siglec) extracellular region mediates
	B-cell adhesion to ligands on endothelial cells in the bone marrow. Its intracellular domain is
	phosphorylated after cross-linking of antigen receptor or MHC class II antigen. It is involved in
	negative regulation of B-cell activation and protection from autoimmunity. B-cell proliferative
	responses to LPS or anti-mouse Ig μ chain are augmented in the presence of Cy34.1 mAb.

Product Details

Form	Liquid
Concentration	0.2 mg/mL
Size	25µg/100µg
Clone No.	Cy34.1
Host	Mouse
Isotype	Mouse IgG1, ĸ
Reactivity	Mouse
Application	FCM
Isotype Control	PerCP/Cyanine5.5 Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09793J]
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Shipping	Biological ice pack at 4 °C
Stability & Storage	Keep as concentrated solution.
	Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.
	This product is guaranteed up to one year from purchase.

For Research Use Only

Elabscience®

Fluorophore

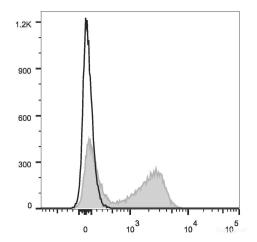

Conjugation: PerCP/Cyanine5.5

PerCP/Cyanine5.5 is designed to be excited by the blue laser (488 nm) and detected using an optical filter centered near 675 nm (e.g., a 690/50 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is $0.1-1 \mu g/10^6$ cells in $100 \mu L$ volume].

Product data

C57BL/6 murine splenocytes are stained with PerCP/Cyanine5.5 Anti-Mouse CD22 Antibody (filled gray histogram). Unstained splenocytes (empty black histogram) are used as control.
