Elabscience®

FITC Anti-Mouse CD4 Antibody[GK1.5]

Catalog No.E-AB-F1097UCStorageStore at 2~8°C, Avoid freeze / thaw cycles

ReactivityMouseApplicationsFCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names	T-cell surface glycoprotein CD4,CD4,T-cell surface antigen T4/Leu-3,CD4
Uniprot ID	P06332
Background	CD4 is a 55 kD protein also known as L3T4 or T4. It is a member of the Ig superfamily,
	primarily expressed on most thymocytes, a subset of T cells, and weakly on macrophages and
	dendritic cells. It acts as a coreceptor with the TCR during T cell activation and thymic
	differentiation by binding MHC class II and associating with the protein tyrosin kinase, lck.

Product Details

Form	Liquid
Concentration	0.5 mg/mL
Size	25µg/100µg
Clone No.	GK1.5
Host	Rat
Isotype	Rat IgG2b, κ
Reactivity	Mouse
Application	FCM
Isotype Control	FITC Rat IgG2b, κ Isotype Control[LTF-2] [Product E-AB-F09843C]
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Shipping	Biological ice pack at 4 °C
Stability & Storage	Keep as concentrated solution.
	Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.
	This product is guaranteed up to one year from purchase.

For Research Use Only

Elabscience®

Fluorophore

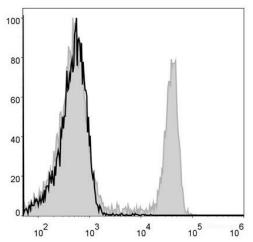

Conjugation: FITC

FITC is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 530 nm (e.g., a 525/40 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is $0.1-1 \mu g/10^6$ cells in $100 \mu L$ volume].

Product data

C57BL/6 murine splenocytes are stained with FITC Anti-Mouse CD4 Antibody (filled gray histogram). Unstained splenocytes (empty black histogram) are used as control.
