# FITC Anti-Mouse CD49b/pan-NK cells Antibody[DX5]

Catalog No. E-AB-F1116UC Reactivity Mouse Storage Store at 2~8°C, Avoid freeze / thaw cycles **Applications FCM** 

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

**Alternate Names** Integrin alpha-2,CD49 antigen-like family member B,Collagen receptor,Platelet membrane

glycoprotein Ia, GPIa, VLA-2 subunit alpha, CD49b

**Uniprot ID** O62469

**Background** DX5 antigen has been recently characterized as CD49b. It is a 150 kD integrin  $\alpha$  chain also

> known as  $\alpha$ 2 integrin, VLA-2  $\alpha$  chain, and integrin  $\alpha$ 2 chain. CD49b non-covalently associates with CD29 (\beta1 integrin) to form the CD49b/CD29 complex known as VLA-2, a receptor for collagen and laminin. CD49b is expressed on platelets, the majority of NK cells, NKT cells, and a small subset of CD8+ T cells (this population can be significantly increased following viral infection). DX5 is used for the identification and isolation of NK cells, and is especially useful

for identifying NK cells in mice lacking the NK1.1 antigen.

### **Product Details**

**Form** Liquid Concentration 0.5 mg/mL Size  $25 \mu g / 100 \mu g$ 

Clone No. DX5 Host Rat Isotype Rat IgM, κ Reactivity Mouse **FCM Application** 

**Isotype Control** FITC Rat IgM, κ Isotype Control[RTK2118] [Product E-AB-F09773C]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

# **Fluorophore**

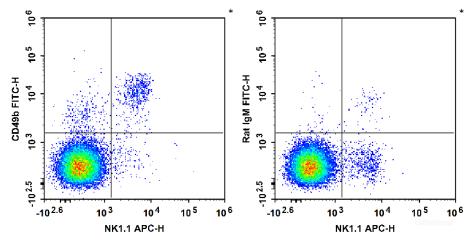

Conjugation: FITC

FITC is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 530 nm (e.g., a 525/40 nm bandpass filter).

## **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1  $\mu g/10^6$  cells in  $100~\mu L$  volume].

### **Product data**

C57BL/6 murine splenocytes are stained with APC Anti-Mouse CD161/NK1.1 Antibody and FITC Anti-Mouse CD49b Antibody (Left). Splenocytes are stained with APC Anti-Mouse CD161/NK1.1 Antibody and FITC Rat IgM, κ Isotype Control (Right).
