Elab Fluor® 647 Anti-Mouse CD279/PD-1 Antibody[29F.1A12]

Catalog No.E-AB-F1131UMReactivityMouseStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsFCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names PD-1, Programmed Death-1

Uniprot ID Q02242

Background CD279, also known as programmed death-1 (PD-1), is a 50-55 kD glycoprotein belonging to the

CD28 family of the Ig superfamily. PD-1 is expressed on activated splenic T and B cells and thymocytes. It is induced on activated myeloid cells as well. PD-1 is involved in lymphocyte clonal selection and peripheral tolerance through binding its ligands, B7-H1 (PD-L1) and B7-DC (PD-L2). It has been reported that PD-1 and PD-L1 interactions are critical to positive selection and play a role in shaping the T cell repertoire. PD-L1 negative costimulation is essential for

prolonged survival of intratesticular islet allografts.

Product Details

 $\begin{tabular}{lll} Form & Liquid \\ Concentration & 0.5 mg/mL \\ Size & 25 \mu g/100 \mu g \\ Clone No. & 29F.1A12 \\ Host & Rat \\ \end{tabular}$

 $\begin{tabular}{lll} \textbf{Isotype} & Rat IgG2a, \kappa \\ \textbf{Reactivity} & Mouse \\ \textbf{Application} & FCM \\ \end{tabular}$

Isotype Control Elab Fluor[®] 647 Rat IgG2a, κ Isotype Control[2A3] [Product E-AB-F09833M]

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

A Reliable Research Partner in Life Science and Medicine

Fluorophore

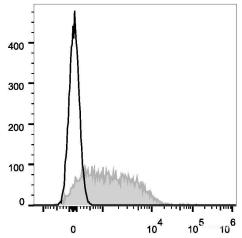

Conjugation: Elab Fluor® 647

Elab Fluor $^{\otimes}$ 647 is designed to be excited by the Red laser (627-640 nm) and detected using an optical filter centered near 670 nm (e.g., a 660/20 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is $0.1-1~\mu g/10^6$ cells in $100~\mu L$ volume].

Product data

Con-A stimulated C57BL/6 splenocytes (3 days) are stained with Elab Fluor[®] 647 Anti-Mouse CD279/PD-1 Antibody (filled gray histogram). Unstained splenocytes (empty black histogram) are used as control.
