# PE Anti-Mouse FcεRIα Antibody[MAR-1]

Catalog No.E-AB-F1188UDReactivityMouseStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsFCM

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### **Antigen Information**

Alternate Names Uniprot ID Background High affinity immunoglobulin epsilon receptor subunit alpha,Fc-epsilon RI-alpha,FcERI,Fcer1a

P20489

**Background** Fc $\epsilon$ RI $\alpha$  is a transmembrane protein belonging to the Ig superfamily. Fc $\epsilon$ RI $\alpha$  forms a tetrameric

complex with one  $\beta$  and two  $\gamma$ -subunits. The Fc\epsilonRI complex plays an important role in triggering IgE-mediated allergic reactions. It is abundantly expressed on mast and basophils and upregulated by the presence of IgE. Following stimulation via Fc\epsilonRI\alpha, mast cells and basophils release bioactive chemical mediators such as histamine, resulting in the initiation of allergic reactions. Cross linking of the high-affinity receptor for IgE on tissue mast cells triggers immediate hypersensitivity with local symptoms. The MAR-1 monoclonal antibody reacts with

the FceRIa subunit.

#### **Product Details**

 $\begin{tabular}{lll} Form & Liquid \\ Concentration & 0.2 mg/mL \\ Size & 25 \mu g/100 \mu g \\ Clone No. & MAR-1 \\ \end{tabular}$ 

**Host** Armenian Hamster **Isotype** Armenian Hamster IgG

**Reactivity** Mouse **Application** FCM

Isotype Control PE Armenian Hamster IgG Isotype Control[PIP] [Product E-AB-F09853D]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

**Shipping** Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

## **Fluorophore**

#### Conjugation: PE

PE is designed to be excited by the Blue (488 nm), Green (532 nm) and Yellow-Green (561 nm) lasers and detected using an optical filter centered near 575 nm (e.g., a 585/42 nm bandpass filter).

### **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is  $0.1-1~\mu g/10^6$  cells in  $100~\mu L$  volume].

#### **Product data**

C57BL/6 murine bone marrow cells are stained with APC Anti-Mouse CD49b Antibody and PE Anti-Mouse FcεRIα Antibody (Left). Bone marrow cells stained with APC Anti-Mouse CD49b Antibody and PE Armenian Hamster IgG Isotype Control (Right) are used as control.
