

A Reliable Research Partner in Life Science and Medicine

Elab Fluor® 647 Anti-Human CD69 Antibody[FN50]

Catalog No.E-AB-F1138MReactivityHumanStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsFCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names Uniprot ID Early activation antigen CD69, Activation inducer molecule, AIM, EA1, MLR-5

Q07108

Background CD69 is a 27-33 kD type II transmembrane protein also known as activation inducer molecule

(AIM), very early activation antigen (VEA), and MLR3. It is a member of the C-type lectin family, expressed as a disulfide-linked homodimer. Other members of this receptor family include NKG2, NKR-P1 CD94, and Ly49. CD69 is transiently expressed on activated leukocytes

including T cells, thymocytes, B cells, NK cells, neutrophils, and eosinophils. CD69 is

constitutively expressed by a subset of medullary mature thymocytes, platelets, mantle B cells, and certain CD4+ T cells in germinal centers of normal lymph nodes. CD69 is involved in early events of lymphocyte, monocyte, and platelet activation, and has a functional role in redirected

lysis mediated by activated NK cells.

Product Details

Form Liquid

Size 20Tests/100Tests/100Tests×2

Clone No. FN50 Host Mouse

Isotype Mouse IgG1, κ **Reactivity** Human

Reactivity Human **Application** FCM

Isotype Control Storage BufferElab Fluor[®] 647 Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792M]

Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

A Reliable Research Partner in Life Science and Medicine

Fluorophore

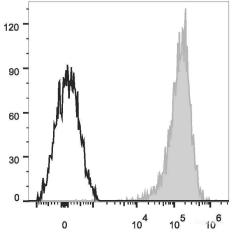

Conjugation: Elab Fluor® 647

Elab Fluor $^{\odot}$ 647 is designed to be excited by the Red laser (627-640 nm) and detected using an optical filter centered near 670 nm (e.g., a 660/20 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Product data

PMA and ionomycin-stimulated (4h) Jurkat cells are stained with Elab Fluor[®] 647 Anti-Human CD69 Antibody (filled gray histogram) or Mouse IgG1 Isotype Control Elab Fluor[®] 647 (empty black histogram).
