## PE/Cyanine5 Anti-Human CD197/CCR7 Antibody[G043H7]

Catalog No.E-AB-F1159GStorageStore at 2~8°C, Avoid freeze / thaw cycles

ReactivityHumanApplicationsFCM

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

#### **Antigen Information**

Alternate Names Uniprot ID Background	CMKBR7, EBI1, EVI1,CCR-7,CDw197 P32248 CCR7, also known as CD197, is a chemokine receptor that binds CCL19 and CCL21. CCR7 and its ligands link innate and adaptive immunity by affecting interactions between T cells and dendritic cells and their downstream effect. Naïve T cells enter the lymph node through high endothelial venules, which express CCL21. Dendritic cells and macrophages enter the lymph node through afferent lymphatics. The encounter of T cells and dendritic cells in the T cell zone is CCR7-dependent. In addition, during immunological surveillance, B cells recirculate between B- cell-rich compartments (follicles or B cell zones) in secondary lymphoid organs, surveying for antigen. After antigen binding, B cells move to the boundary of B and T zones to interact with T-
	antigen. After antigen binding, B cells move to the boundary of B and T zones to interact with T- helper cells; this B cell migration is directed by CCR7 and its ligands. CCR7-positive cancer cell expression has been associated with lymph node metastasis.
Product Details	

#### **Product Details**

Form	Liquid
Size	20Tests/100Tests/100Tests×2
Clone No.	G043H7
Host	Mouse
Isotype	Mouse IgG2a, ĸ
Reactivity	Human
Application	FCM
Isotype Control	PE/Cyanine5 Mouse IgG2a, κ Isotype Control[C1.18.4] [Product E-AB-F09802G]
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Shipping	Biological ice pack at 4 °C
Stability & Storage	Keep as concentrated solution.
	Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.
	This product is guaranteed up to one year from purchase.

**For Research Use Only** 

# **Elabscience**®

### Fluorophore

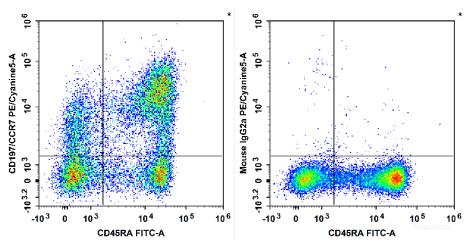

#### Conjugation: PE/Cyanine5

PE/Cyanine5 is designed to be excited by the Blue (488 nm), Green (532 nm) and yellow-green (561 nm) lasers and detected using an optical filter centered near 670 nm (e.g., a 690/50 nm bandpass filter).

#### **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

### **Product data**

Human peripheral blood lymphocytes are stained with FITC Anti-Human CD45RA Antibody and PE/Cyanine5 Anti-Human CD197/CCR7 Antibody[G043H7] (Left). Lymphocytes are stained with FITC Anti-Human CD45RA Antibody and PE/Cyanine5 Mouse IgG2a, κ Isotype Control (Right).
