

A Reliable Research Partner in Life Science and Medicine

Elab Fluor® 488 Anti-Mouse CD24 Antibody[M1/69]

E-AB-F1179L Catalog No. Reactivity Mouse Storage Store at 2~8°C, Avoid freeze / thaw cycles **Applications FCM**

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names Cd24a, Ly-52, HAS, Nectadrin, R13-Ag, X62 heat stable antigen

Uniprot ID P24807

Background CD24 is a 35-45 kD protein also known as Heat Stable Antigen (HSA), Ly-52, or Nectadrin. It is

a GPI-linked sialoglycoprotein expressed on lymphocytes, granulocytes, epithelial cells,

thymocytes, monocytes, erythrocytes, and dendritic cells. CD24 expression varies during T and B cell differentiation and is a useful marker for delineating various lymphocyte developmental stages. CD24 serves as an adhesion or costimulatory molecule involved in T and B lymphocyte

activation and differentiation by homophilic binding or binding to CD62P.

Product Details

Form Liquid

50Tests/100Tests/100Tests×2 Size

Clone No. M1/69 Rat Host

Isotype Rat IgG2b, κ Mouse Reactivity **Application FCM**

Elab Fluor[®] 488 Rat IgG2b, κ Isotype Control[LTF-2] [Product E-AB-F09842L] **Isotype Control**

Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant. **Storage Buffer**

Biological ice pack at 4 °C Shipping Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

Fluorophore

Conjugation: Elab Fluor® 488

Elab Fluor[®] 488 is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 520 nm (e.g., a 525/40 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
