# Elab Fluor® 488 Anti-Human IgD Antibody[IA6-2]

E-AB-F1171L Catalog No. Reactivity Human Storage Store at 2~8°C, Avoid freeze / thaw cycles **Applications FCM** 

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

**Alternate Names** Immunoglobulin heavy constant delta,IGHD,Ig delta chain C region

**Uniprot ID** 

**Background** IgD, a member of the immunoglobulin (Ig) family, is expressed in naïve B cells. It has 3 Ig-like

domains and exists in a transmembrane and a soluble form. In general, IgD is not secreted and usually its expression is lost after the Ig isotype switch. After antigen binding, IgD signals through

the CD79a/CD79b (Iga/Igβ) heterodimer, resulting in the activation of the B cell.

#### **Product Details**

Form Liquid

20Tests/100Tests/100Tests×2 Size

Clone No. IA6-2 Host Mouse

**Isotype** Mouse IgG2a, κ

Human Reactivity **Application FCM** 

**Isotype Control** Elab Fluor<sup>®</sup> 488 Mouse IgG2a, κ Isotype Control[C1.18.4] [Product E-AB-F09802L] Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant. **Storage Buffer** 

**Shipping** Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

## **Fluorophore**

Conjugation: Elab Fluor® 488

Elab Fluor  $^{\$}$  488 is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 520 nm (e.g., a 525/40 nm bandpass filter).

### **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

#### **Product data**

Human peripheral blood lymphocytes are stained with Elab Fluor® 488 Anti-Human IgD Antibody (filled gray histogram). Unstained lymphocytes (empty black histogram) are used as control.
