# Elab Fluor® 488 Anti-Human CD1a Antibody[OKT-6]

Catalog No. E-AB-F1126L Reactivity Human Storage Store at 2~8°C, Avoid freeze / thaw cycles **Applications FCM** 

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

**Alternate Names** T6, R4,CD 1a,CD1A, T-cell surface glycoprotein CD1a

**Uniprot ID** P06126

**Background** CD1a is a 49 kD member of the immunoglobulin superfamily also known as T6 and R4. It is a

type I membrane glycoprotein with structural similarities to MHC class I and is non-covalently associated with β2-microglobulin. CD1a plays a role in non-peptide glycolipid antigen presentation to CD1-restricted T cells. It is expressed on cortical double positive and single positive thymocytes, Langerhans cells, and dendritic cells. In addition to antigen presentation,

CD1a has been implicated in thymic T cell development.

### **Product Details**

Form Liquid

20Tests/100Tests/100Tests×2 Size

Clone No. OKT-6 Host Mouse

**Isotype** Mouse IgG1, κ

Human Reactivity **FCM Application** 

Elab Fluor<sup>®</sup> 488 Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792L] **Isotype Control** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant. **Storage Buffer** 

Biological ice pack at 4 °C Shipping Keep as concentrated solution. Stability & Storage

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

# **Fluorophore**

Conjugation: Elab Fluor® 488

Elab Fluor<sup>®</sup> 488 is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 520 nm (e.g., a 525/40 nm bandpass filter).

## Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
