# FITC Anti-Rat CD45 Antibody[OX-1]

Catalog No.E-AB-F1227CReactivityRatStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsFCM

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### **Antigen Information**

**Alternate Names** Receptor-type tyrosine-protein phosphatase C,Leukocyte common antigen, LCA, T200,

Ly-5,Ptprc

**Uniprot ID** P04157

**Background** CD45 is a 180-220 kD protein also known as leukocyte common antigen (LCA). It is a protein

tyrosine phosphatase with multiple isoforms differing as a result of alternative splicing of the extracellular domain and glycosylation. CD45 is expressed on all hematopoietic cells except erythrocytes and platelets; isoform expression depends on cell type, activation state, and cell maturation. CD45 functions in signal transduction through T and B cell antigen receptors. CD45 has been shown to interact with various proteins including galectin-1, CD2, CD3, and CD4. The OX-1 antibody has been shown to partially inhibit NK cell-mediated lysis of syngeneic tumor

cells in vitro.

#### **Product Details**

Form Liquid

Size 50Tests/100Tests/100Tests×2

Clone No. OX-1 Host Mouse

**Isotype** Mouse IgG1, κ

**Reactivity** Rat **Application** FCM

**Isotype Control** FITC Mouse IgG1,  $\kappa$  Isotype Control[MOPC-21] [Product E-AB-F09792C]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

**Shipping** Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

## **Fluorophore**

Conjugation: FITC

FITC is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 530 nm (e.g., a 525/40 nm bandpass filter).

### Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

#### **Product data**

Rat splenocytes are stained with FITC Anti-Rat CD45 Antibody (filled gray histogram). Unstained splenocytes (empty black histogram) are used as control.
