

Recombinant Human CD155/PVR/NECL5 Protein (His Tag)

Catalog Number:PKSH033563

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Synonyms	Poliovirus Receptor;Nectin-Like Protein 5;NECL-5;CD155;PVR;PVS
Species	Human
Expression Host	HEK293 Cells
Sequence	Trp21-Asn343
Accession	NP_006496
Calculated Molecular Weight	36.1 kDa
Observed molecular weight	58 kDa
Tag	C-His
Bioactivity	Loaded Human TIGIT-Fc on Protein A Biosensor, can bind Human PVR-His with an affinity constant of 4.22 nM as determined in BLI assay.

Properties

Purity	> 95 % as determined by reducing SDS-PAGE.
Endotoxin	< 1.0 EU per µg of the protein as determined by the LAL method.
Storage	Store at < -20°C, stable for 6 months. Please minimize freeze-thaw cycles.
Shipping	This product is provided as liquid. It is shipped at frozen temperature with blue ice/gel packs. Upon receipt, store it immediately at < -20°C.
Formulation	Supplied as a 0.2 µm filtered solution of 20mM PB, 150mM NaCl, pH 7.4.
Reconstitution	Not Applicable

Data

> 95 % as determined by reducing SDS-PAGE.

Background

Poliovirus Receptor (PVR) is a 70 kDa type I transmembrane single-span glycoprotein that belongs to the nectin-like (Necl) family and was originally identified based on its ability to mediate the cell attachment and entry of poliovirus (PV); an etiologic agent of the central nervous system disease poliomyelitis. PVR contains three Ig-like extracellular domains; a transmembrane segment; and a cytoplasmic tail. The normal cellular function of PVR maybe the involvement of intercellular adhesion between epithelial cells. Alternate splicing of the PVR mRNA yields four different isoforms (α ; β ; γ ; and δ) with identical extracellular domains.
