

Recombinant Human CDO/CDON Protein (His Tag)

Catalog Number:PKSH033720

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Synonyms	Cell adhesion molecule-related/down-regulated by oncogenes;CDON;CDO
Species	Human
Expression Host	HEK293 Cells
Sequence	Asp26-Pro943
Accession	Q4KMG0
Calculated Molecular Weight	100.4 kDa
Observed molecular weight	120-135 kDa
Tag	C-His

Properties

Purity	> 85 % as determined by reducing SDS-PAGE.
Endotoxin	< 1.0 EU per µg of the protein as determined by the LAL method.
Storage	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
Shipping	This product is provided as lyophilized powder which is shipped with ice packs.
Formulation	Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4. Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization. Please refer to the specific buffer information in the printed manual.
Reconstitution	Please refer to the printed manual for detailed information.

Data

> 85 % as determined by reducing SDS-PAGE.

Background

CDO (CAMrelated/down-regulatedby oncogenes) is a member of the Immunoglobulin (Ig) superfamily, Ig/Fibronectin (FN)type III repeat family of cell surface proteins. Human CDO is a type I transmembrane (TM) glycoprotein. It is synthesized as a 1287 amino acid (aa) precursorthat contains a 25 aa signal sequence, a 938 aa extracellular domain (ECD), a 21 aa TM segment and a 303 aa cytoplasmic region. The ECD contains five C2-typeIglikedomains, followed by three FN type III repeats. The ECD of human CDO is 85% aa identical to mouse CDO ECD.CDO is found on muscle precursor and neural progenitor cells of the embryo. It likely promotes muscle differentiation, and contributes to axon guidance andneuronal patterning.
