

PPBP Polyclonal Antibody

Catalog Number:E-AB-19288

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	Human
Immunogen	Synthetic peptide of human PPBP
Host	Rabbit
Isotype	IgG
Purification	Antigen affinity purification
Conjugation	Unconjugated
Formulation	PBS with 0.05% NaN ₃ and 40% Glycerol,pH7.4

Applications Recommended Dilution

WB	1:1000-1:5000
IHC	1:25-1:100
ELISA	1:2000-1:10000

Data

Western blot analysis of Human plasma solution using PPBP Polyclonal Antibody at dilution of 1:500

Observed Mw:Refer to figures
Calculated Mw:14 kDa

Immunohistochemistry of paraffin-embedded Human lung cancer tissue using PPBP Polyclonal Antibody at dilution of 1:35(×200)

Immunohistochemistry of paraffin-embedded Human breast cancer tissue using PPBP Polyclonal Antibody at dilution of 1:35(×200)

Preparation & Storage

Storage Store at -20°C. Avoid freeze / thaw cycles.

Background

PPBP (Pro-Platelet Basic Protein) is a Protein Coding gene. Diseases associated with PPBP include Erythromelalgia and

PPBP Polyclonal Antibody

Catalog Number: E-AB-19288

Colloid Adenoma. Among its related pathways are GPCR Pathway and Peptide ligand-binding receptors. GO annotations related to this gene include growth factor activity and glucose transmembrane transporter activity. An important paralog of this gene is CXCL1. The protein encoded by this gene is a platelet-derived growth factor that belongs to the CXC chemokine family. This growth factor is a potent chemoattractant and activator of neutrophils. It has been shown to stimulate various cellular processes including DNA synthesis, mitosis, glycolysis, intracellular cAMP accumulation, prostaglandin E2 secretion, and synthesis of hyaluronic acid and sulfated glycosaminoglycan. It also stimulates the formation and secretion of plasminogen activator by synovial cells. The protein also is an antimicrobial protein with bactericidal and antifungal activity.
