# GSK3 alpha/beta Polyclonal Antibody

Catalog Number: E-AB-31628 1 Publications

Note: Centrifuge before opening to ensure complete recovery of vial contents.

### **Description**

Reactivity Human, Mouse, Rat

**Immunogen** Synthesized peptide derived from human GSK3α/β around the non-phosphorylation

site of Tyr279/216.

Host Rabbit IgG Isotype

**Purification** Affinity purification

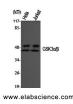

Conjugation **Unconjugated** 

**Formulation** PBS with 0.02% sodium azide, 0.5% protective protein and 50% glycerol, pH7.4

#### **Applications Recommended Dilution**

WB 1:500-1:2000 **IHC** 1:100-1:300 **ELISA** 1:20000

#### Data

Western Blot analysis of Hela, Jurkat cells using GSK3 alpha/beta Polyclonal Antibody at dilution of 1:1000.

Observed Mw:51,46kDa Calculated Mw:51kDa

# **Preparation & Storage**

Store at -20°C. Avoid freeze / thaw cycles. Storage

## **Background**

Glycogen synthase kinase-3 (GSK-3) was initially identified as an enzyme that regulates glycogen synthesis in response to insulin. GSK-3 is a ubiquitously expressed serine/threonine protein kinase that phosphorylates and inactivates glycogen synthase. GSK-3 is a critical downstream element of the PI3 kinase/Akt cell survival pathway whose activity can be inhibited by Akt-mediated phosphorylation at Ser21 of GSK-3α and Ser9 of GSK-3βGSK-3 has been implicated in the regulation of cell fate in Dictyostelium and is a component of the Wnt signaling pathway required for Drosophila, Xenopus and mammalian development. GSK-3 has been shown to regulate cyclin D1 proteolysis and subcellular localization.
