

# CK-13 Polyclonal Antibody

Catalog Number:E-AB-13787

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## Description

<b>Reactivity</b>	Human,Mouse,Rat
<b>Immunogen</b>	Recombinant protein of human KRT13
<b>Host</b>	Rabbit
<b>Isotype</b>	IgG
<b>Purification</b>	Affinity purification
<b>Conjugation</b>	Unconjugated
<b>Formulation</b>	PBS with 0.05% sodium azide and 50% glycerol, PH7.4

## Applications Recommended Dilution

<b>WB</b>	1:200-1:1000
<b>IHC</b>	1:50-1:200

## Data

Western Blot analysis of Human esophagus cancer tissue using CK-13 Polyclonal Antibody at dilution of 1:500

**Calculated Mw:50kDa**

Immunohistochemistry of paraffin-embedded Human brain using CK-13 Polyclonal Antibody at dilution of 1:35

Immunohistochemistry of paraffin-embedded Human cervical cancer using CK-13 Polyclonal Antibody at dilution of 1:35

## Preparation & Storage

**Storage** Store at -20°C. Avoid freeze / thaw cycles.

## Background

The protein encoded by this gene is a member of the keratin gene family. The keratins are intermediate filament proteins responsible for the structural integrity of epithelial cells and are subdivided into cytokeratins and hair keratins. Most of the type I cytokeratins consist of acidic proteins which are arranged in pairs of heterotypic keratin chains. This type I

# CK-13 Polyclonal Antibody

Catalog Number: E-AB-13787

cytokeratin is paired with keratin 4 and expressed in the suprabasal layers of non-cornified stratified epithelia. Mutations in this gene and keratin 4 have been associated with the autosomal dominant disorder White Sponge Nevus. The type I cytokeratins are clustered in a region of chromosome 17q21.2. Alternative splicing of this gene results in multiple transcript variants; however, not all variants have been described.
