

CK-8 Polyclonal Antibody

Catalog No. E-AB-13908

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

| | |
|---------------------|---|
| Reactivity | Human, Mouse, Rat |
| Immunogen | Recombinant protein of human KRT8 |
| Host | Rabbit |
| Isotype | IgG |
| Purification | Affinity purification |
| Conjugation | Unconjugated |
| Buffer | PBS with 0.05% sodium azide and 50% glycerol, PH7.4 |

Applications

Recommended Dilution

IHC 1:50-1:200

Data

Immunohistochemistry of paraffin-embedded Human liver cancer tissue using CK-8 Polyclonal Antibody at dilution 1:40

Immunohistochemistry of paraffin-embedded Human breast cancer tissue using CK-8 Polyclonal Antibody at dilution 1:40

Preparation & Storage

Storage Store at -20°C. Avoid freeze / thaw cycles.

Background

This gene is a member of the type II keratin family clustered on the long arm of chromosome 12. Type I and type II keratins heteropolymerize to form intermediate-sized filaments in the cytoplasm of epithelial cells. The product of this gene typically dimerizes with keratin 18 to form an intermediate filament in simple single-layered epithelial cells. This protein plays a role in maintaining cellular structural integrity and also functions in signal transduction and cellular differentiation. Mutations in this gene cause cryptogenic cirrhosis. Alternatively spliced transcript variants have been found for this gene.
