## Recombinant Human STC2/Stanniocalcin 2 Protein (Fc Tag)

Catalog No. PKSH030584

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Synonyms STC-2;STCRP

Species Human

**Expression Host** HEK293 Cells **Sequence** Met 1-Arg302

AccessionO76061Calculated Molecular Weight57.7 kDaObserved molecular weight63 kDaTagC-hFc

**Bioactivity** Not validated for activity

### **Properties**

**Purity** > 85 % as determined by reducing SDS-PAGE.

Endotoxin < 1.0 EU per ug of the protein as determined by the LAL method.

**Storage** Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to

-80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots

of reconstituted samples are stable at < -20°C for 3 months.

**Shipping** This product is provided as lyophilized powder which is shipped with ice packs.

**Formulation** Lyophilized from sterile PBS, pH 7.4

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as

protectants before lyophilization.

Please refer to the specific buffer information in the printed manual.

**Reconstitution** Please refer to the printed manual for detailed information.

#### Data

> 85 % as determined by reducing SDS-PAGE.

## **Background**

STC2 is a secreted; homodimeric glycoprotein which expressed in a wide variety of tissues. STC2 has an anti-hypocalcemic action on calcium and phosphate homeostasis. It may have autocrine or paracrine functions. Its C-terminus

contains a cluster of histidine residues which may interact with metal ions. STC2 has 10 of its 15 cysteine residues conserved among stanniocalcin family members and is phosphorylated by casein kinase 2 exclusively on its serine residues. It may play a role in the regulation of renal and intestinal calcium and phosphate transport; cell metabolism; or cellular calcium/phosphate homeostasis.
