Recombinant Human SLAMF6/Ly108 Protein (aa 1-226, His Tag)

Catalog No. PKSH030961

Note: Centrifuge before opening to ensure complete recovery of vial contents.

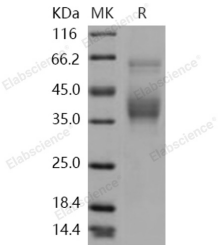
Description

Synonyms	SLAM Family Member 6;Activating NK Receptor;NK-T-B-Antigen;NTB-A;CD352;SLAMF6;KALI;Ly108;NTBA;SF2000
Species	Human
Expression Host	HEK293 Cells
Sequence	Met 1-Met 226
Accession	Q96DU3-1
Calculated Molecular Weight	24.3 kDa
Observed molecular weight	38-40 kDa
Tag	C-His
Bioactivity	Measured by its ability to bind biotinylated recombinant human SH2D1A in a functional ELISA.

Properties

Purity	> 90 % as determined by reducing SDS-PAGE.
Endotoxin	< 1.0 EU per μg of the protein as determined by the LAL method.
Storage	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80℃. Reconstituted protein solution can be stored at 4-8℃ for 2-7 days. Aliquots of reconstituted samples are stable at < -20℃ for 3 months.
Shipping	This product is provided as lyophilized powder which is shipped with ice packs.
Formulation	Lyophilized from sterile PBS, pH 7.4 Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization. Please refer to the specific buffer information in the printed manual.
Reconstitution	Please refer to the printed manual for detailed information.

Data



> 90 % as determined by reducing SDS-PAGE.

SLAM family member 6; also known as Activating NK receptor; NK-T-B-antigen; NTB-A; SLAMF6; KALI and Ly108; is a single-pass type I membrane protein which belongs to the CD2 subfamily of the immunoglobulin superfamily. SLAMF6 / Ly108 contains one Ig-like (immunoglobulin-like) domain. It is expressed by all (resting and activated) natural killer cells (NK); T- and B-lymphocytes. SLAMF6 / Ly108 triggers cytolytic activity only in natural killer cells (NK) expressing high surface densities of natural cytotoxicity receptors. SLAMF6 / Ly108 is a homodimer. It interacts with PTN6 and; upon phosphorylation; with PTN11 and SH2D1A/SAP. SLAMF6 / Ly108 undergoes tyrosine phosphorylation and associates with the Src homology 2 domain-containing protein (SH2D1A) as well as with SH2 domain-containing phosphatases (SHPs). It may function as a coreceptor in the process of NK cell activation. SLAMF6 / Ly108 can also mediate inhibitory signals in NK cells from X-linked lymphoproliferative patients.
