# **Recombinant Mouse EphA3 Protein (His Tag)**

Catalog No. PKSM040313

Note: Centrifuge before opening to ensure complete recovery of vial contents.

### Description

Synonyms AW492086;Cek4;End3;ETK1;Hek;Hek4;Mek4;Tyro4

**Species** Mouse

Expression Host
Sequence
Met1-His541
Accession
NP\_796047.2
Calculated Molecular Weight
Tag
C-His

Bioactivity Immobilized mouse EPHA3-His at 10 μg/mL (100 μL/well) can bind mouse

EFNA5-Fc. The EC50 of mouse EFNA5-Fc is 4. 9-11.4ng/mL.

## **Properties**

**Purity** > 95 % as determined by reducing SDS-PAGE.

**Endotoxin** < 1.0 EU per μg of the protein as determined by the LAL method.

**Storage** Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to

-80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots

of reconstituted samples are stable at < -20°C for 3 months.

**Shipping** This product is provided as lyophilized powder which is shipped with ice packs.

**Formulation** Lyophilized from sterile PBS, pH 7.4

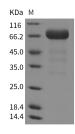

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as

protectants before lyophilization.

Please refer to the specific buffer information in the printed manual.

**Reconstitution** Please refer to the printed manual for detailed information.

#### Data

> 95 % as determined by reducing SDS-PAGE.

### **Background**

EPHA3 gene belongs to the ephrin receptor subfamily of the protein-tyrosine kinase family. EPH and EPH-related receptors have been implicated in mediating developmental events, particularly in the nervous system. The ephrin

#### For Research Use Only

receptors are divided into 2 groups based on the similarity of their extracellular domain sequences and their affinities for binding ephrin-A and ephrin-B ligands. EPHA3 gene encodes a protein that binds ephrin-A ligands. EPHA3 is involved in the retinotectal mapping of neurons. It may also control the segregation but not the guidance of motor and sensory axons during neuromuscular circuit development.
