# FITC Anti-Mouse CD274/PD-L1 Antibody[10F.9G2]

Catalog No. E-AB-F1132UC Reactivity Mouse Storage Store at 2~8°C, Avoid freeze / thaw cycles **Applications FCM** 

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

**Alternate Names** B7-H1, PD-L1, Programmed cell death ligand 1,B7 homolog 1,B7-H, B7H1, PDL1, PDCD1L1,

PDCD1LG1

**Uniprot ID O9EP73** 

**Background** CD274, also known as B7-H1 or programmed death ligand 1 (PD-L1), is a 40 kD type I

> transmembrane protein and a member of the B7 family within the immunoglobulin receptor superfamily. It is expressed on T cells, B cells, NK cells, dendritic cells, IFN-y activated endothelial cells, and monocytes. B7-H1 is one of the ligands of PD-1. The interaction of B7-H1 with PD-1 plays an important role in the inhibition of T cell responses. Other studies have shown that B7-H1 is able to costimulate T cell growth and cytokine production. CD274 is involved in costimulation essential for T cell proliferation and production of IL-10 and IFN-y, in an IL-2-dependent and a PD-1-independent manner. Its interaction with PD-1 inhibits T cell

proliferation and cytokine production.

### **Product Details**

Form Liquid Concentration 0.5 mg/mL 25µg/100µg Size Clone No. 10F.9G2 Host Rat

Rat IgG2b, κ **Isotype** Reactivity Mouse **Application FCM** 

**Isotype Control** FITC Rat IgG2b, κ Isotype Control[LTF-2] [Product E-AB-F09843C]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

# **Fluorophore**

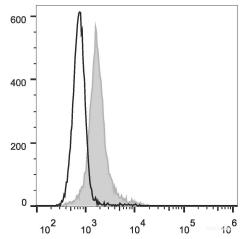

Conjugation: FITC

FITC is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 530 nm (e.g., a 525/40 nm bandpass filter).

## **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is  $0.1-1~\mu g/10^6$  cells in  $100~\mu L$  volume].

#### **Product data**

C57BL/6 murine splenocytes are stained with FITC Anti-Mouse CD274/PD-L1 Antibody (filled gray histogram).

Unstained splenocytes (empty black histogram) are used as control.
