SARS-COV-2 NP Monoclonal Antibody(2019-nCoV)

Catalog Number:E-AB-V1018

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Reactivity	SARS-COV2
Immunogen	Recombinant 2019-nCoV Nucleocapsid Protein (His Tag)
Host	Mouse
Isotype	IgG1
Clone	4A6
Conjugation	Unconjugated
Formulation	PBS, pH 7.4
Applications	Recommended Dilution
ELISA	1:5000-1:10000
Data	

Immobilized 2019-nCoV Nucleocapsid Protein (Cat#PKSR030485) at 5.0 μ g/mL (100 μ L/well) can bind 2019-nCoV NP Antibody (4A9)(Cat#E-AB-V1018), the EC50 for this effect is 29.8 ng/mL.

Preparation & Storage

Storage

Store at -20°C. Avoid freeze / thaw cycles.

Background

Coronavirus N protein is required for coronavirus RNA synthesis, and has RNA chaperone activity that may be involved in template switch. Nucleocapsid protein is a most abundant protein of coronavirus. N protein packages the positive strand viral genome RNA into a helical ribonucleocapsid (RNP) and plays a fundamental role during virion assembly through its interactions with the viral genome and membrane protein M. Plays an important role in enhancing the efficiency of subgenomic viral RNA transcription as well as viral replication. Because of the conservation of N protein sequence and its strong immunogenicity, the N protein of coronavirus is chosen as a diagnostic tool.
