

# Recombinant SARS-CoV Nucleoprotein / NP Protein (His Tag)

Catalog Number:PKSV030248

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## Description

<b>Synonyms</b>	coronavirus NP Protein;SARS;coronavirus Nucleocapsid Protein;SARS;coronavirus Nucleoprotein Protein;SARS;cov np Protein;SARS;ncov NP Protein;SARS;novel coronavirus NP Protein;SARS;novel coronavirus Nucleocapsid Protein;SARS;novel coronavirus Nucleoprotein Protein;SARS;NP Protein;SARS;Nucleocapsid Protein;SARS;Nucleoprotein Protein;SARS
<b>Species</b>	SARS
<b>Expression Host</b>	Baculovirus-Insect Cells
<b>Sequence</b>	Met1-Ala422
<b>Accession</b>	NP_828858.1
<b>Calculated Molecular Weight</b>	47.5 kDa
<b>Observed molecular weight</b>	47.1 kDa
<b>Tag</b>	C-His

## Properties

<b>Purity</b>	> 80 % as determined by reducing SDS-PAGE.
<b>Endotoxin</b>	< 1.0 EU per µg of the protein as determined by the LAL method.
<b>Storage</b>	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
<b>Shipping</b>	This product is provided as lyophilized powder which is shipped with ice packs.
<b>Formulation</b>	Lyophilized from sterile 20 mM Tris, 500 mM NaCl, 10 % glycerol, pH 7.4. Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization. Please refer to the specific buffer information in the printed manual
<b>Reconstitution</b>	Please refer to the printed manual for detailed information.

## Data

> 80 % as determined by reducing SDS-PAGE.

## Background

Coronaviruses are enveloped viruses with a positive-sense RNA genome and with a nucleocapsid of helical symmetry. Coronavirus nucleoproteins localize to the cytoplasm and the nucleolus, a subnuclear structure, in both virus-infected primary cells and in cells transfected with plasmids that express N protein. Coronavirus N protein is required for coronavirus RNA synthesis, and has RNA chaperone activity that may be involved in template switch. Nucleocapsid

# Recombinant SARS-CoV Nucleoprotein / NP Protein (His Tag)

Catalog Number:PKSV030248

---

protein is a most abundant protein of coronavirus. During virion assembly, N protein binds to viral RNA and leads to formation of the helical nucleocapsid. Nucleocapsid protein is a highly immunogenic phosphoprotein also implicated in viral genome replication and in modulating cell signaling pathways. Because of the conservation of N protein sequence and its strong immunogenicity, the N protein of coronavirus is chosen as a diagnostic tool.
